

**Intelligent Transportation Systems services to provide signal modernization design for the
Grand Traverse County and city QA2
Requisition 1955
3/23/2016**

Question:

The RFP lists “Broadband Radio interconnect” for certain locations in the signal design scope, and the System Engineering document notes that the Broadband Radio interconnect will be completed under a project in 2019. Can you verify if it is the intent of this project to cover all design of the broadband radio interconnect for all study locations or if there is a separate ITS communications project that we are to coordinate with as part of this project’s design?

Answer:

It is the intent of this project to cover all design of the broadband radio interconnect called for in the scope of service. At this time, there is not a separate ITS communications project with which to coordinate.
